

Bhargavi Chella

Full-Stack Software Engineering Lead (React & AI-Assisted Workflows)

Email: bhargavibanu3513@gmail.com | Phone: +91 9391057631

Portfolio: [bhargavi-portfolio](#) | LinkedIn: [bhargavi](#) | GitHub: [bhargavi35](#)

Location: Hyderabad, India | Immediate Joiner

PROFESSIONAL SUMMARY

Dynamic Full-Stack Developer with 4 years of professional experience designing, building, and deploying scalable web applications and responsive interfaces. Strong expertise in frontend architecture using React.js, global state management via Redux Toolkit, and building secure server-side software. Highly skilled in utilising AI-assisted development tools (Claude, Cursor, ChatGPT) to optimise code quality, automate testing, and accelerate feature delivery speed. Experienced in developer documentation, technical writing, and peer mentoring within collaborative Agile team environments.

TECHNICAL SKILLS

Core Frontend & Full-Stack Expertise: React.js, Next.js, JavaScript (ES6+), TypeScript, Redux Toolkit, Context API, Responsive Web Design

AI-Assisted Development Tools: Claude, Cursor, ChatGPT, Gemini, DeepSeek, Automated Code Generation, Prompt Engineering

Backend & API Integration: Node.js, ExpressJS, RESTful API Integration, Asynchronous Programming, JSON, AJAX

Database & Tooling Systems: MongoDB (Core Experience), PostgreSQL Foundations, Git/GitHub, Azure DevOps, Vite, Webpack

Secondary & Foundational Frameworks (Basic Knowledge Only): Python Programming, Microservices System Design

Deployment: Vercel, Netlify, Heroku

Authentication: Keycloak, NextAuth (RBAC)

PROFESSIONAL EXPERIENCE

Software Engineer | ProcureX Technologies (Product-Based Company)

June 2025 – June 2026 | Hyderabad, India

Product company building an enterprise procurement, project, and CRM suite for the construction industry.

- Own frontend implementation across **Procure-to-Pay, Project Management, Work Order Management, and Control Tower** modules — React + TypeScript + Redux + Ant Design
- Architected a **Builder Agreement Template engine** — drag-and-drop document editor with rich text (Quill), dynamic variables, theme support, and PDF/DOCX import (mammoth.js, pdf.js)
- Built a **Sequence Settings engine** for configurable document numbering across business workflows
- Designed a reusable, strongly-typed component library, reducing duplication across 5+ modules
- Optimised application performance through code splitting, React.memo, and lazy-loaded routes — meaningfully improved Time-to-Interactive on data-heavy screens
- Partnered with the backend team to refine API contracts (pagination, filtering, error envelopes)

React JS Developer | Lex Nimble Solutions Pvt. Ltd.

April 2023 – June 2025 | Hyderabad, India

Built multi-tenant SaaS platforms for content, transaction, and CMS use cases.

- Implemented **RBAC** end-to-end using Keycloak and NextAuth with role-based route guards, API-level authorisation, and tenant isolation
- Maintained high test coverage with Jest, React Testing Library, and Cypress; introduced testing patterns adopted across the team

- Designed reusable UI primitives and integrated them into a shared component library
- Delivered features for the **StacX platform** serving thousands of multi-tenant users (CMS, POS, transactions, employee/volunteer modules)
- Built SSR and ISR applications using Next.js — improved Core Web Vitals and SEO for marketing-facing pages

Junior Software Developer | Yoonefi Technology Solutions

February 2022 – February 2023 | Hyderabad, India

- Built and maintained **MERN stack** applications with responsive UIs
 - Developed scalable **React.js** components with Redux state management
 - Implemented real-time features using **WebSocket** (chat, live notifications)
 - Contributed to performance work — bundle size reduction, lazy loading
-

PROJECTS

Builder Agreement Template Engine — ProcureX (CRM)

A Google-Doc-style legal document editor for property sale, construction, and lease agreements.

- Quill.js integration with custom external formatting toolbar (solved focus management edge cases)
- Client-side **PDF parsing** with pdf.js + **DOCX parsing** with mammoth.js
- Dynamic variable substitution, theme system, A4 page simulation
- Drag-and-drop block reordering with serializable state model

Tech: React, TypeScript, Quill, pdf.js, mammoth.js, Redux

Control Tower Risk Dashboard — ProcureX

Centralised executive analytics view rolling up procurement, project, and budget signals into Red/Amber/Green indicators across all modules.

- Built a reusable charting/template engine consumed by 4+ feature modules
- Server-side pagination, filtering, and dynamic tables for large datasets
- Drill-down navigation across cross-functional risk views (project, procurement, work order, budget)

Tech: React, TypeScript, Ant Design, ECharts

Additional ProcureX Modules I Built / Contributed To

Procure-to-Pay & Buyer Portal — Implemented Inventory & Store Management workflows (material handling, master data); built Bulk Upload/Export (CSV/XLSX) with validation and error handling; designed configurable Approval Hierarchy engine for multi-level procurement workflows.

Project Management System (PMS) — Built real-time collaboration features using Socket.io (issues, comments, notifications); developed timesheet and log-hour modules with automated reporting and Gantt-chart integration.

Work Order Management (WOM) — Architected **Sequence Settings engine** for configurable document numbering across business workflows; built BOQ (Bill of Quantities), Work Order, and RA Bills (Running Account Bills) modules; implemented contractor risk-flag system.

Tech Stack across modules: React.js, TypeScript, Redux, Ant Design, Socket.io, MongoDB

StacX Multi-tenant SaaS — Lex Nimble Solutions

Global platform across CMS, POS, employee, and volunteer systems.

- Multi-tenant architecture with RBAC (Keycloak + NextAuth)
- CMS with content creation, publishing workflows, and role-based visibility
- POS & transaction system with subscriptions, payments, and reporting

Tech: Next.js, React, TypeScript, Tailwind CSS, Node.js

EDUCATION

- **B.Tech in Electronics and Communication Engineering** – Vivekananda Institute of Technology & Science
 - **Full Stack Web Development Certification** – Masai School
-

CERTIFICATIONS

- Full Stack Web Development - Masai
 - JavaScript Algorithms - freeCodeCamp
 - MongoDB Toolkit - GeeksforGeeks
-

ADDITIONAL INFORMATION

- Published **10+ technical articles** on GeeksforGeeks
- Strong interest in system design & scalable applications
- **Interests:** Pencil sketching, music, open-source contributions, technical blogging, community engagement
